Date: Monday, November 16, 2015 1:05:00 PM

Myra, based on the conversations held last week, please add dissolved metals, plus mercury, to the list of analyses needed for ground water samples collected for Wilcox site. This will be a total of 12 samples (includes the QC) for dissolved metals and dissolved mercury.

Tom/Jon, the lab really needs the QAPP. Please send it out to the team.

thanks

Thanks, Myra. Katrina is out this week, so look for her approval next week.

Best regards,

Tom

Importance: High

Hello Thomas – At this time we have scheduled a total of 10 station locations and one field QC (dup) for TM, Hg, CN to be shipped during the three week sampling event. If you add Dissolved Metals, I will have to increase the number of samples and

forward to SMO to include in the Modified Analysis contract. Also, **I need Katrina's approval to the addition of this analysis before it is forwarded to SMO.**

As soon as her approval is received please revise the lab request form and submit as soon as possible.

Take care.

Katrina/Myra –

We estimated 10 samples from temporary wells to be analyzed for metals. We would like to run them for both total and dissolved metals; therefore, we will need up to 20 analyses, not just the 10 we originally estimated. Okay?

The problem with both is that they only requested 10 water samples for metals. With 10 wells, that's only one metal sample per well.

We should probably forward this to Katrina in case she wants to request 10 more samples.

Jon

I would say both.

Tom,

Sorry for the multiple emails with questions, but we are doing our materials planning and keep finding new questions.

The next is, are we doing Total Metals or Dissolved Metals? I need to know whether we need filtering capability.

Thanks,
